WSIBLAW Outsourcing™ Services

Norm Keith is pleased to announce that Gowlings' OHS practice group now provides WSIBLAW Outsourcing™ services for clients in Ontario. Gowlings has experienced legal and paralegal professionals, including a former WSIB Claims Adjudicator, who provide advice and representation in preventing, managing and appealing WSIB claims. Our professionals regularly represent employers at WSIB and WSIAT appeal hearings.

COMPASS™ “cloud computing” software advantage

Gowlings has used cloud computing technology to develop our proprietary software, COMPASS™, which offers clients 24/7 real-time access to their workers' compensation claims management information. Clients receive unlimited access to our proprietary software for all WSIB claims managed by Gowlings, which helps to reduce WSIB costs, enhance file security and improve claims management. All relevant information regarding the adjudicative process is entered into COMPASS™ so that **you can** monitor the progress of **your files** remotely.
